The Core Values Behind Our Product

Innovative fabrication methods, aided by high-precision machines and in-depth wood research, enable us to achieve unparalleled quality.

Despite technology's advances, surface treatments are performed by hand for that irreplaceable human touch. Knots are attentively prepared and surfaces are hand-planed, ensuring each plank is one-of-a-kind. We employ manual planers for intricate bevels that amplify texture and volume.

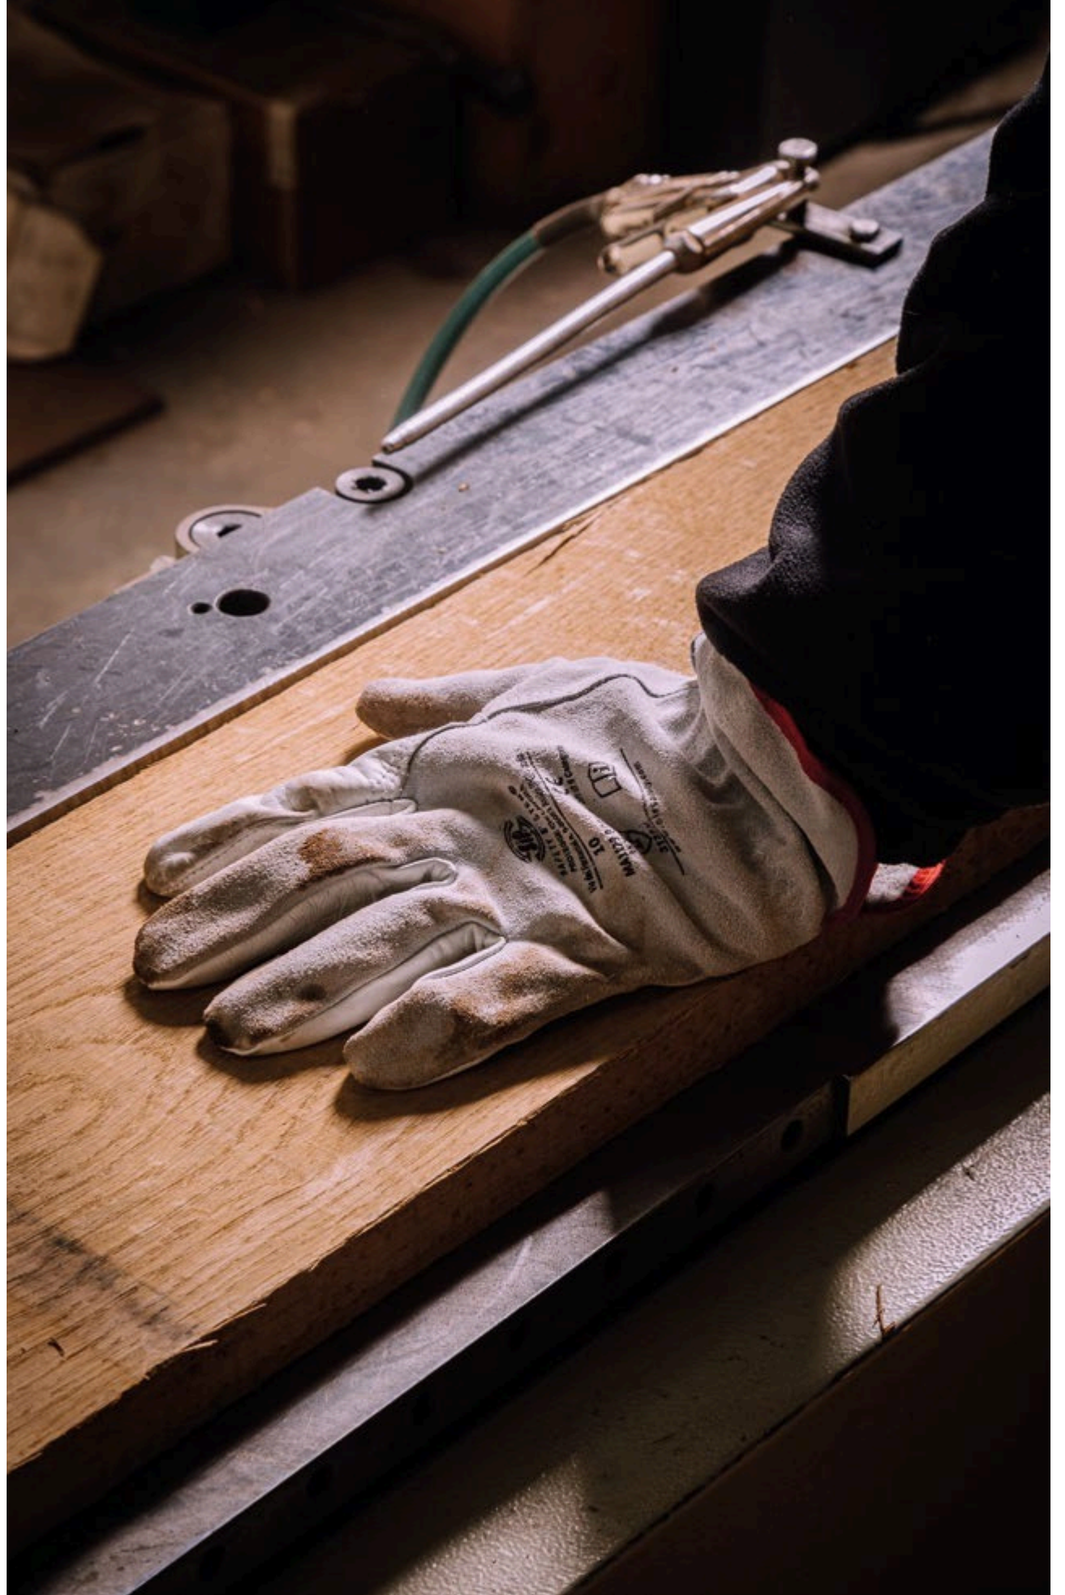

Our commitment to these practices produces flooring that not only aligns with nature's beauty but also offers a legacy product built to last for generations.

SOTTO
SOPRA
SOTTO

Handcrafting is integral to our surface detailing.

A material whose history is woven into its fibers, transformed by us into a product designed to endure for generations.
